

GLUTEN SAFE PRODUCTS

*Gluten Safe Information:

Many of you ask and we want to be very transparent. While these “gluten safe” products have NO gluten, we do have products in our facility that do have gluten and although we take every precaution when preparing these products that we do not have any of these products out or in use at the time, we cannot guarantee that cross-contamination could not occur. If you have any concerns, it is best to talk to one of our staff so we can best answer any questions or concerns you may have. We have several family members with Celiac Disease and Gluten Intolerances and they are able to safely eat the products listed here.
